EDUCATION

National Technological University, Rafaela, Santa Fe
Advanced Technical Degree in Programming | Completed: December 2020

Certifications and Technical Courses

- **Full Stack Web Development**: Coderhouse, 2023 (HTML5, CSS3, JavaScript, ReactJS, Node.js, Express, MongoDB)
- **Data Analysis with Power BI**: Coderhouse, 2024 (Power BI)

SKILLS

Programs/Tools: Vercel, Netlify, Xampp, PhpMyAdmin, Discord, ChatGPT, GitHub, WampServer, Power BI Desktop, Express, Node.js, Scrum
Programming Languages:

- Proficient: JavaScript
- Basic Knowledge: TypeScript, PHP
- Introductory Experience: Python (currently learning)
- Intermediate: SQL
  Frameworks/Libraries: ReactJS, Tailwind CSS, basic knowledge of Next.js and Bootstrap
  Databases: MySQL (intermediate), Microsoft SQL Server (intermediate)
  Languages: English: B2 Level (EF SET, 59/100 or equivalent)

PROJECTS

Trivia Web Game about Cobra Kai and Karate Kid series
Final project for Coderhouse JavaScript course

- **Technologies**: JavaScript (ES6+), HTML5, CSS3, SASS
- Designed and developed a trivia web game from scratch, showcasing analytical skills to create a JSON file with questions and answers.
- Integrated the JSON file with JavaScript functions (DOM manipulation) and applied CSS3 and SASS for styling.

E-commerce Website for Tech Products
Final project for Coderhouse ReactJS course

- **Technologies**: ReactJS, Formik, Bootstrap, Firebase, JavaScript
- Built an e-commerce platform focusing on ReactJS implementation. Used Bootstrap for rapid styling and Formik for purchase form validation.
- Leveraged Firebase to store product images and data, with JavaScript as the primary programming language.

E-commerce Backend Development
Final project for Coderhouse Backend Programming course

- **Technologies**: Node.js, Express, MongoDB, JSON Web Token (JWT), Stripe, Handlebars, JavaScript
- Developed the backend of an e-commerce application using Node.js and Express. Also I implemented JWT for authentication, and used MongoDB for data storage.
- I integrated Stripe for payment handling and Handlebars for client-side templating.

WORK EXPERIENCE

Administrative Assistant | AGT Automatizaciones
February 2023 – October 2024

- Managed material orders for the factory, negotiating with suppliers to ensure timely delivery.
- Monitored and recorded employees' work hours in Excel, calculating hours for monthly payroll reports.
- Conducted price inquiries with multiple suppliers, ensuring competitive options for the company.
- Uploaded and managed company documentation on supplier portals, including Mahle's platform.

Freelance Full Stack Developer | My Work
March 2022 – February 2023

- **Frontend and Backend Development**: Made updates and added new features to websites for various local businesses, handling both frontend and backend tasks.
- **Technologies Used**: HTML5, CSS3, JavaScript, Ajax, jQuery, PHP, XAMPP, MySQL.
- Collaborated closely with a senior developer, receiving guidance for implementing complex tasks.
